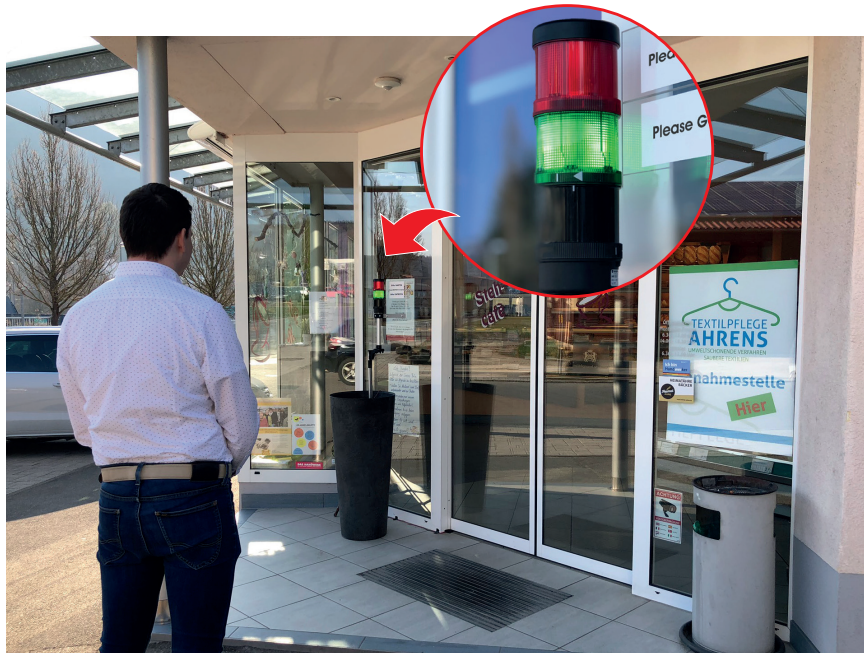
Smart*ACCESS* Management wireless



Access at the touch of a button

With WERMA's Crowd Management you can easily signal to people in front of the entrance whether access can currently be granted.

This ensures that there are not too many people in the shop and that the social distancing can be maintained.

The WERMA Crowd Management set consists of a stack light with wireless transmitter, base, and a power adaptor unit for a 115 V power supply.

The Crowd Management is ideal for supermarkets, smaller retailers such as bakeries, butcher shops, or even gas stations, pharmacies and hospitals. For other applications we will be happy to put together an individual set for you. Contact us: us-info@werma.com.

115 V power supply
